DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-40 and 47-55, drawn to a process for producing an image, classified in class 427, subclass 66.
 - II. Claims 41-46 and 56-62, drawn to a treated substrate, classified in class 428, subclass 690.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process forms a substrate comprising a recording liquid whereas the product does not require a recording liquid.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. This application contains claims directed to the following patentably distinct species of the claimed opaque coating composition:
 - a. the combination of a monomeric polyacid and a monomeric polybase
 - b. the combination of a monomeric polyacid and a polymeric polybase

- c. the combination of a polymeric polyacid and a monomeric polybase
- d. the combination of a polymeric polyacid and a polymeric polybase

The following further election is required:

If a monomeric polyacid is selected, one compound from those listed in claim 9 must also be selected.

If polymeric polyacid is selected, one compound from those listed in claim 14 must also be selected.

If monomeric polybase is selected, one compound from those listed in claim 10 must also be selected.

5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1- 4, 6, 7, and 21-62 are generic.

6. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

7. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1774

8. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
9. A telephone call was made to Diane Reed on June 7, 2002 to request an oral election to the above restriction requirement, but applicant's representative requested a written requirement.
10. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dawn Garrett whose telephone number is (703) 305-0788. The examiner can normally be reached Monday through Friday from 9:00 a.m. to 5:00 p.m. E.S.T.
